

System Test Plan

Instructions. In this section, you must provide your system test plan with at least 5 test cases. **If you want to provide more than 5 test cases, add an appendix at the end of this document with the 6th, 7th, etc. test cases so that page numbers for all sections match the required template! Only the first 5 test cases will be graded.**

Make sure:

- You provide your sample test data
- Test IDs are uniquely identified and descriptive
- Test descriptions are fully specified with complete inputs, specific values, and preconditions
 - Be sure to provide SPECIFIC INPUTs and VALUEs so that your test cases are repeatable
- Expected results are fully specified with specific output values
- All tests cover scenarios based on the problem statement
- All tests cover unique scenarios for the system
- All strategies for system testing are demonstrated in the tests (testing equivalence classes, testing boundary values, testing exceptions/unexpected inputs)

Test Data:

For my system test cases, I will use the following test files:

emptyPeople.txt

USERNAME,FIRST_NAME,LAST_NAME

emptyConn.txt

CONNECTION_ID,USERNAME1,USERNAME2,CONNECTED_SINCE_DATE,SOCIAL_MEDIA_PLATFORM

people1.txt

How to launch SocialMediaManger:

To open the SocialMediaManger, open the project within eclipse and locate the SocialMediaManagerUI class found in the manager packet in the src folder. Then run this class as a Java application, and follow the instructions output in the console. Ensure that the necessary test files are within the input folder of the project

Test ID	Description	Expected Results	Actual Results
<p>Test #1</p> <p>testID: viewConnectionsByPersonOneConnection</p> <p>Strategy: (Equivalence class - viewing connections from two valid files)</p>	<p>Preconditions:</p> <ul style="list-style-type: none"> • SocialMediaManagerUI has been successfully launched • The files people1.txt and connections1.txt exist in the input folder <p>Steps:</p> <ol style="list-style-type: none"> 1. Enter “people1.txt” as the people file 2. Enter “connections1.txt” as the connection file 3. Enter “1” to display connection by person 4. View results 5. Enter “3” to exit UI 	<p>The console displays the following info: Two peoples connections are displayed, with both displaying the same connection besides the name and username displayed</p> <p>Enter the people file name: people1.txt</p> <p>Enter the connection file name: connections1.txt</p> <p>Choose an option: 1. Display connections by person 2. Display connections by platform 3. Exit SocialMediaManager Enter : 1</p> <p>Connections for Justin Boyer (boyerj706) { Napoleon Kertzmnn (kertzmannn329) on Telegram since Wed Nov 16 03:42:00 EST 2016 }</p> <p>Connections for Napoleon Kertzmnn (kertzmannn329) { Justin Boyer (boyerj706) on Telegram since Wed Nov 16 03:42:00 EST 2016 }</p> <p>Choose an option: 1. Display connections by person 2. Display connections by platform 3. Exit SocialMediaManager Enter : 3 Exiting.</p>	<p>The console displays the following info:</p> <p>Enter the people file name: people1.txt</p> <p>Enter the connection file name: connections1.txt</p> <p>Choose an option: 1. Display connections by person 2. Display connections by platform 3.
